MIXING PUMP
PFT G 5 c
COMPLETE, COMPACT, COST-EFFECTIVE

The successor of the PFT G 4, Europe’s most successful mixing pump. The best-priced entry-level model to the PFT range of products. Choose the PFT G 5c for the same reasons for which thousands of craftsmen and entrepreneurs before you have decided in favour of PFT technology.

FIELDS OF APPLICATION
For pumpable, ready-mixed dry mortars, such as:
- Machine-applied gypsum plasters
- Gypsum-lime plasters
- Cement renders
- Lime plasters
- Cement-lime renders
- Masonry mortars
- Insulating plasters
- Slot mortars
- Reinforcing and bonding mortars
- Self-levelling floor screeds
- Fango materials
- ... and many more

ADVANTAGES AT A GLANCE
- Long conveying distance
- Variable output from 6 to 55 l/min with only one mixing tube, simply by changing the pump
- Compressor with pressure switch-off
- Universally applicable
- Long service life
- Can be combined with the entire PFT range of machines
- Especially economical when used with the PFT SIOMAT
- Minimum maintenance
- Simple and fast cleaning
- Easy to operate
- Low filling height
- Can be used directly under container / silo
- Completely equipped
- Powder-coated
- Large steering rollers
- Clear documentation
- Safety tested by Bauberufsgenossenschaft BBG (Accident Prevention and Insurance Association for the building sector)
- In accordance with CE-Directives
Technical Data: PFT G 5 c 400 V
Output: Conveying pressure: * max. 25 bar
Conveying distance: * with Ø 25 mm/35 mm:
max. 50 m

Power connection: Three-phase current: 400 V, 50 Hz
Fuse protection: 25 A
Power cable: 400 V, 50 Hz, 3 phases

Drive: Star wheel motor: 0.3 kW, 3 phases, 12 rpm
Pump motor: 5.5 kW, 3 phases, 400 rpm

Rotor/Stator: TWISTER D 5–2.5 L
Pump capacity: * approx. 23 l/min

Dimensions L/W/H: 1,500 / 65 / 1,150 mm
Filling height: 900 mm
Total weight: approx. 263 kg
